

# ELITE SATIN

**ELITE SATIN HAS JUST 8-10% OF WATER CONTENT AS OPPOSED TO OTHER WATER BASED PAINTS, HENCE PROVIDING A SUPERIOR PROTECTIVE COATING.**

## USES

ELITE SATIN is a highly durable and weather resistant paint for interior and exterior use on all ferrous and non-ferrous substrates.

## ADVANTAGES

- excellent adhesion and elasticity
- colour fast and UV resistant
- fungal retardant
- non-flammable and fire retardant
- exceptional scrubbing endurance
- easy application and fast drying
- breathable allowing moisture to escape

## APPLICATION

It can adhere easily to any surface and is highly elastic. It is heat and fungi resistant and does not give out any odour or toxic secretion on V.O.C application.

Elite Paint has a wonderful eggshell finish while drying fast and does not get affected by even hard scrubbing.

## TECHNICAL PROPERTIES

Colour	Available in satin sheen, ultra matt, and gloss and textured finishes
UV resistance	Excellent
Chemical resistance	Excellent
Water resistance	Excellent
Hardening resistance	Excellent
Drying time	60min (touch dry) 24hours (full cure)
Spreading rate	8-10 m <sup>2</sup> /L

## CLEANUP

Use water to clean all the equipment thoroughly after using it.

## STORAGE

Store the sealed containers at moderate temperatures.
